

Eau Gallie Little League Crane Field Scoreboard Operation

Please try and take care of the control boxes; **they cost over \$500 each**. They should not get wet, try not to drop, and when finished, return to concession and try and remind the concession worker to plug the battery in to recharge. If concession happens to be closed, find another secure area for the controller.

Jimmy Moore scoreboard will be installed over Spring Break.

Directions:

The breakers (physically located at the scoreboard) for the scoreboards themselves **should not be turned off**.

TO TURN THE SCOREBOARD ON;

Turn the control box on; push the reset button. The board should now read 1st inning, and score should be 0 to 0.

TO TURN THE SCOREBOARD OFF;

Turn control box off. Then push and hold option while turning control box back on. Once you turn control box on, let go of option, and push enter. The scoreboard lights should go out, and then you can secure the control box and battery in concession or elsewhere.

If a number 8 flashes for the inning; Ooops! Try and repeat steps to turn scoreboard off. If that does not work, check connections to the antenna on the control box; make sure all connections are secure.
